DESCRIPTION OF THE WORKSHOP

The plastic workshop includes various activities, the purpose of which is to make children aware of the harmful effect that plastic has on them and on the environment. In order to achieve this we demonstrate examples of objects made of plastic that people use in their everyday lives and suggest alternatives to replace them.

We do this in the informal atmosphere by employing different games and visual presentation. We also use cartoons to make the information about plastic effects on the animals and environment more accessible for kids.

We act. NOW!

The 11 months volunteer project is aimed at expanding knowledge of the environment and multiculturalism, engaging local communities, especially kids and youth, strengthening open society and active citizens by cross-sectional education.
